
Oracle Hyperion Planning for an Optimized EPM Solution

CHARLOTTE, NC, April 2009 – Analytic Vision today announced several new customer wins and large Planning implementations with Oracle Hyperion customers. The company celebrated the wins and recent implementations with leading global, regional, and mid-market companies such as GMAC Insurance, Volvo Financial Services, Bureau of National Affairs, Angelica, The Pantry, AIG United Guaranty, Cree, MedCath Corporation, PRA International, and Duke University Health System. These companies recently licensed or implemented Oracle's Hyperion market-leading Planning technology and Enterprise Performance Management applications to extend the value of data in ERP systems, data warehouses and other corporate data sources.

By leveraging Hyperion's complete, open, and integrated Planning and Forecasting platform, these customers are able to analyze key business metrics to drive profitability and drive efficient business planning and forecasting across their entire organization. In addition, by leveraging Analytic Vision's proven implementation methodology these customers are able to develop the internal knowledge and expertise needed to enhance the applications going forward. These customers can also rely on Analytic Vision's proven support and application maintenance services in a post implementation support role.

"Leading organizations worldwide are standardizing on the Oracle Hyperion platform faster than ever before, reinforcing the strong demand for an integrated family of Enterprise Resource Planning, Enterprise Performance Management, and Business Intelligence solutions that help them understand and optimize their businesses," Jason Little, Principal at Analytic Vision.

GMAC Insurance recently selected Oracle Hyperion Planning and Analytic Vision to implement a global Expense Planning and Workforce Planning Application to improve business plan efficiency, implement enhanced controls, workflow, and simplify global reporting.
