
Existing Analytic Vision Customers Continue to Adopt Oracle's Latest EPM 11 Platform as a Centralized and Integrated Solution for Performance Management and Business Intelligence

CHARLOTTE, NC., April 2009 – Analytic Vision today acknowledged the trend that existing customers of Oracle Hyperion Essbase, Hyperion Planning, Hyperion Financial Management and Scorecard continue to adopt Oracle's new EPM 11 Fusion Edition platform as an enterprise solution to meet their reporting and planning needs. Oracle's new EPM 11 Fusion Edition Platform introduces many new features and improvements that customers have been expecting for years and is the latest signal that Oracle's acquisition of Hyperion continues to be a strategic win for former Hyperion and Oracle customers looking to upgrade and implement a new EPM or BI roadmap with Oracle's latest EPM 11 Fusion Edition.

"More than ever, for organizations to remain competitive in today's challenging economic environment, it's critical that employees have the right EPM and BI technology at their finger tips to constantly monitor and measure the performance of the organization along with forecasting and predicting accurate results in days, weeks and months ahead." Jason Little, Principal at Analytic Vision.

By leveraging Analytic Vision's proven implementation methodology and best practices for upgrading and implementing the latest EPM 11 platform, customers can have the confidence they need to take this important step in the next generation of their EPM and BI solutions. Volvo Financial Services recently licensed and selected Oracle's EPM 11 Fusion Edition and Analytic Vision to implement a global Enterprise Performance Management System that included the upgrade of legacy Hyperion applications and the implementation of several new EPM 11 applications that delivered significant process improvements and return on investments.
